

OPEN AND FULLY OPERATIONAL

Today **HYGIENE**
is within your reach.

COVID-19

We are a company that has been designing and manufacturing specific solutions for restrooms open to the public for 50 years. At this moment of great emergency and crisis for the **COVID-19** we offer our expertise through our product lines of **ELECTRONIC**, **PEDAL**, **SELF-CLOSING** and **CLINICAL LEVER** taps. Easy to install, they eliminate the possibility of contagion in public spaces, representing the ideal answer to the antibacterial standards required.

Electronic taps

Clinical lever taps

Pedal taps

Self-closing taps

Electronic taps with automatic rinsing

The automatic activation of the water flow, thanks to the integrated infrared sensor, avoids cross-contamination between users. The automatic rinse every 24H solves the bacterial proliferation (legionella) due to the stagnation of water inside the taps.

02511 - ONE series electronic basin tap with infrared sensor.

02512 - ONE series electronic basin mixer with infrared sensor.

02503/1 - CURVE series electronic basin tap with infrared sensor.

02503/1S - CURVE series electronic basin soap/hand sanitizer dispenser.

02535 - STYLE series wall mounted electronic basin tap with infrared sensor.

02552 - ONE series wall mounted electronic basin/sink mixer with infrared sensor and swivel spout.

02582 - ONE series electronic basin/sink tap with infrared sensor for plasterboard walls mounting.

02582S - ONE series electronic soap / hand sanitizer dispenser.

Multifunction washbasins

It is the new solution that allows you to wash, soap, rinse and dry your hands, all in one, with a compact design. It is a multifunction wall mounted sink made of solid material, equipped with water dispenser, soap dispenser and air hand dryer. All devices are electronic, allowing to save water and energy and to ensure a better cleaning. It is turned on with the simple approach of the hands which makes it accessible to everyone, and it is practical even for people with reduced mobility. It can be used as a single unit or side by side for larger spaces.

ANTIBATTERICO
ANTIBACTERIAL

Clinical lever taps

Hygiene and functionality are the key features of our clinical lever taps that can be opened with the elbow without any contact with the hands. Particularly suitable for healthcare facilities, nursing homes and residences for the elderly, they guarantee the highest level of hygiene by allowing you to wash your hands without touching the tap or other parts of the sink.

Soap dispenser floor stand.

Grab bars

Here's how the bathroom can become safe, to be suitable for "senior" users. Idral is particularly sensitive to this topic and has developed several accessories that can be integrated into the home environment, to give more freedom and safety to the users.
