

# WALL-MOUNTED BOX

## The wall-mounted box make installation easy and the solution more versatile.

*The distinctive feature of this series is the interchangeability of the devices, through the lock between the box and the technical operating parts, prepared to be installed at different times.*

*Besides, there is always the possibility of changing the type of tap hooked to the box even after it is installed into the wall,*

*whenever the new product respects the water connections of the previous one.*

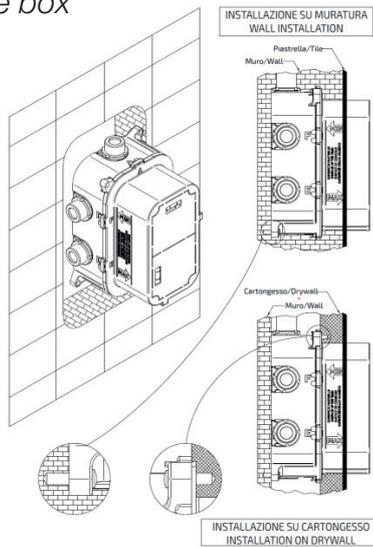

*The box guarantees the watertight insulation of the wall in which the tap is embedded, any trace of water (leakage, humidity) is expelled outside the wall through a specially designed drain channel.*

### Watertight o-ring

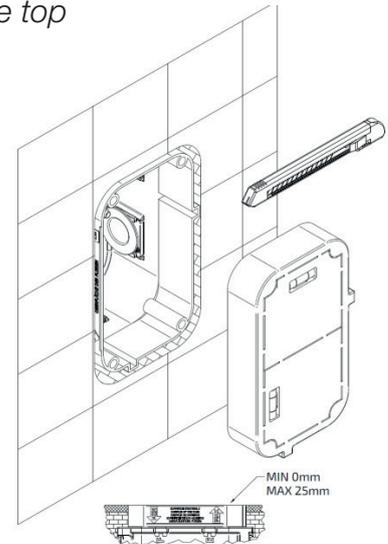

*Built-in levels for easier assembly*

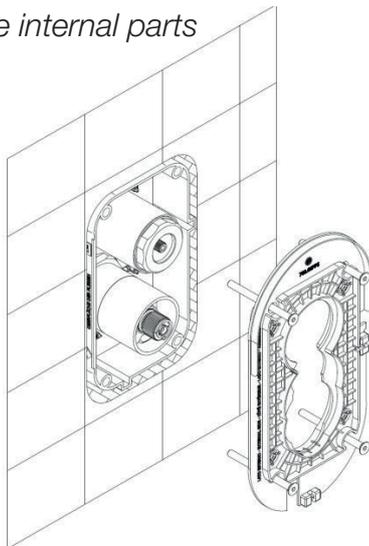

## 1 Install the box

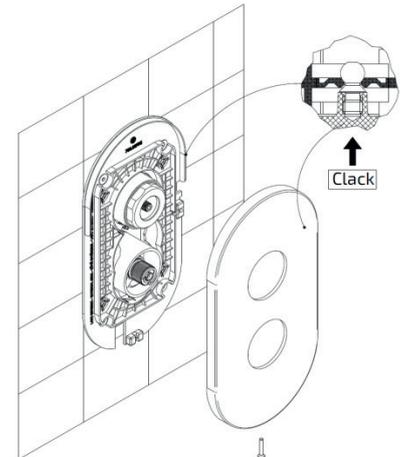

## 2 Cut the top

## 3 Install the internal parts

## 4 Fix the chrome plate

## 5 Complete the installation
