This huge and modern building is the heart of Moreletapark, a southern suburb of Pretoria. This is more than a church, it is the center of the religious, social and cultural activities of this community. The congregation welcomes people of any gender, age and social class. They work together in the construction of a tight community and in spreading the values of cooperation, cohesion and mutual aid, according to the Dutch Reformed Church believes.
IDRAL self-closing flush valves were installed in the bathrooms of this building.

Specifically, the product number 08066, which guarantees maximum hygiene and user-friendliness.

The right product in the right place

Our technology and design allow us to meet the most different needs. We work beside our clients to find and implement the ideal solution for every environment.
